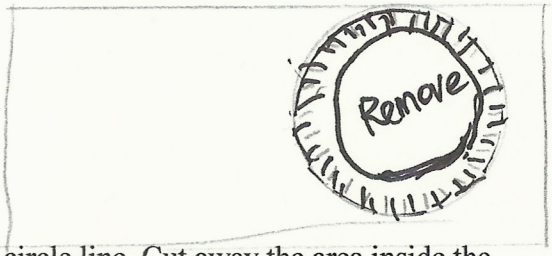
BOM 2.0 - Circles May, 2019 ?? Call- Diane Mitchell 886-0733

Supplies: Grey rectangle
Contrasting fabric 6"-8"
Circle to draw around or tool to draw a circle.
Glue stick-Elmers from the grocery store works swell.

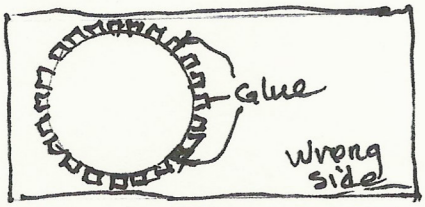
Choose a circle size somewhere between 4' and 6' in diameter.
Your rectangle of grey fabric needs to be 2" or more wider than the circle diameter and 4" or more longer than the width. Cut from the grey fabric.

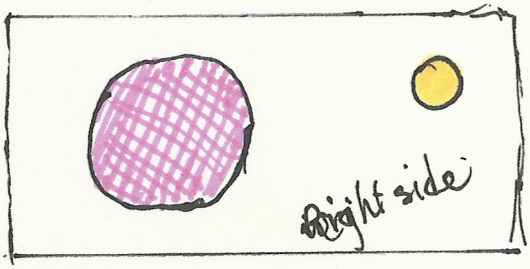
Draw the circle on the reverse side of the grey fabric. Place it closer to an end rather than centering it. This will be your stitching line.



Leave about a ½" seam allowance from your circle line. Cut away the area inside the circle.
Clip every ½" to the drawn line so the seam allowance can be folded under. Press.
Working from the wrong side of the piece apply glue stick to the seam allowance -right side of fabric.

Glue the contrasting fabric over the opening getting it to lay as flatly as possible over the grey piece. Stitch on the line that you drew before cutting the circle innards away and adding glue. Give it a final press. This should make a nice circle that lays flat and smooth.



Place right side of scrap over glued opening. Stitch.


Repeat with a different size circle at the other end of the rectangle if you want. Use the cut out grey from the first circle to do another circle in your contrast circle if you want. Don't like circles-cut an oval instead either freehand or by putting a straight line between the 2 halves of our circle.
